5/14/70

Dear Harold —

This magazine came to my desk at WHO. Usually I don't take the time to look at the unending stream of literature — but for some reason I did flip this one through and caught the names Wecht and Fisher.

Thought you might like to see it, after which please return, as it is WHO property.

Hope you are feeling better. I happened to succumb to a stomach virus (which seems to be a mini-epidemic around here) which somewhat hampered an otherwise welcome visit from Paul Hoch. Very nice chap, I really liked him.

Best —— Sylvia
